Subject: Microsoft Settlement

please, please,... let the voice of 3US² the small guy be heard in this case. 3us² or 3we² the end consumer have no power or voice in these proceedings, only the folks with the power of the almighty dollar get to speak (MS).

i think it to be a travesty that this case is just going to be brushed under the carpet and MS will get a nice soft slap on the hand and a Please do not do that again.

MS should be held accountable to the nth degree, they should be putting a billion dollars in cash into the schools, under privileged, and non-profit orgs. NOT MS PRODUCT!!! this will give MS even more of an unfair advantage, once again shoving aside the opportunity of the small guy!

please do not do this, we need free trade and competition. it is what the moral fiber of our country stands for!! or at least used to stand for..

thank you for your time,

~dZ
